WHY H&G HEALTHCARE

Support your people. Simplify your programme.

A workplace flu clinic gives employees a convenient opportunity to get vaccinated, with support for your business throughout.

01 A service that fits your business

We take time to understand your requirements and tailor clinic arrangements to suit your organisation.

02 Friendly support throughout

Our responsive customer service team helps you organise your clinic and answers questions along the way.

03 A visible commitment to wellbeing

Help employees access vaccination, support staff morale and reduce the disruption that flu-related absence can cause.

Build a programme that works for your team

Talk to us about your workforce, location and preferred clinic arrangements.

OUR SERVICE

Your clinic. Organised with care.

Tell us your preferred date and time, and we will help coordinate the arrangements.

Flexible clinic arrangements

Clinics generally run from 9am to 5pm on Wednesdays, Thursdays and Fridays during October and November. If these times do not suit your team, contact us to discuss alternatives.

Experienced nurses

Our nurses are based across the UK, with experience in workplace vaccination and training updated annually.

Competitive pricing

Competitive pricing without compromising on quality. We guarantee to beat any written quote.

Seasonal flu vaccines

We supply seasonal flu vaccines formulated for the relevant flu season. Our nurse assesses each employee’s suitability before vaccination.

CLINIC COSTS & INCLUSIONS

Clear costs. Everything organised.

The clinic fee covers a registered nurse, delivery and collection of the temperature-controlled box, and the equipment needed to run your clinic.

Clinic duration	Clinic fee
2 hours	**£350**
3 hours	**£390**
4 hours	**£430**
5 hours	**£470**
6 hours	**£510**
7 hours	**£550**
8 hours	**£590**

2-hour clinics: 20 vaccinations minimum, 30 maximum.
8-hour clinics: 120 vaccinations.

Vaccine price: £12.95 per person

Vaccines are charged in addition to the clinic fee, based on final numbers confirmed four weeks before the agreed clinic date. Additional charges may apply to overnight and weekend clinics.

Prices effective from April 2027. Please contact us to confirm your quotation.

What is included in the clinic box?

- Vaccines and cool packs
- Sharps bin and clinical waste bag
- PPE for the nurse
- Plasters and cotton wool
- Anaphylaxis kit and instructions
- Paperwork, including consent forms

HOW IT WORKS

A straightforward clinic, from start to finish.

We coordinate the clinical supplies, nurse and collection arrangements.

1 Before your clinic

Confirm final vaccination numbers four weeks before the clinic. Your clinic box arrives one working day before the appointment.

2 On the day

Our nurse arrives 15 minutes before the start time to set up in the room you have provided.

3 Employee assessment and consent

The nurse asks medical screening questions and checks suitability. Each employee signs a consent form before vaccination; forms are returned to H&G Healthcare for filing.

4 After the clinic

The nurse packs the supplies into the box for collection on the next working day. A returns label is included.

Clinic support: 8am to 5pm during flu season

FREQUENTLY ASKED QUESTIONS

Your questions, answered.

Who can use the workplace clinic?

Our occupational health scheme is for employees of the business, rather than family members. This service covers employees over 16 and up to 65, subject to clinical assessment and vaccine suitability. Employees aged 65 or over are advised to use the NHS for an age-appropriate vaccine.

What if an employee is pregnant?

NHS guidance recommends flu vaccination at any stage of pregnancy. Under our company policy, we do not vaccinate employees in their first trimester through this clinic service. This is a service restriction, not a medical contraindication. Pregnant employees can access NHS vaccination.

Can the injected vaccine cause flu?

No. Injected flu vaccines do not contain live flu viruses and cannot cause flu. Mild reactions, such as a sore arm, aches or a raised temperature, can occur. Protection usually takes up to 14 days to develop.

How effective is the vaccine?

Protection varies by season and individual. Vaccination can reduce the risk of flu; if flu occurs, it may be milder. No vaccine provides complete protection.

Is a vaccination needed every year?

Yes. Protection reduces over time and vaccine composition is reviewed each year to reflect the flu viruses expected to circulate.

Health information: NHS, Flu vaccine and The flu jab in pregnancy. Reviewed 6 November 2026.
